Richard Barrett : Building a Values-Driven Organization before purchasing it in order to gage whether or not it would be worth my time, and all praised Building a Values-Driven Organization:

An "unsung hero" of organizational theoryBy KevinBI was aware of Barrett's work several years before he did consulting work at the firm where I, then, worked. His analysis of corporate culture "entropy", it turned out, accurately predicted the demise of the company (including the timeline). Regrettably, his consulting company was fired by our CEO who was convinced he could "Six Sigma" his way out of a complex array of problems -- that were all detailed in the reports of our culture, the worst of which was that the workforce was hostile to senior management. We had a roadmap to fix it, but, too often, stupid people make really stupid decisions.

Barrett's insights and methods are a genius-level contribution to understanding corporate culture. Do not pass-up this 5-star work. 1 of 1 people found the following review helpful. Excellent Resource on Whole System Change By Parvez Khan I have become a Richard Barrett fan because of this book. Barrett delves deep into his Seven Levels of Consciousness model in this book. It is applicable equally to individuals, small organizational units, small and large businesses, and nations. Values-driven practitioners will find this a gem of a resource and an easy enough read to digest. Of particular note are his Cultural Transformation Tools, which can be leveraged to assess the values and/or organizational consciousness of a business. Barrett will soon release a tome of a book tentatively titled "Love, Fear, and the Destiny of Nations." This is a follow-up to this and his previous works and should prove to be an excellent composition of all his endeavors. 1 of 1 people found the following review helpful. Book Review By Harry R. Owens Jr. Richard Barrett again does an outstanding job of clearly stating his main points, then building on them with facts and good examples. He is able to expertly blend some of the key principles of other authors -- Ken Wilbur and Don Beck -- with some of his material. The text provides some excellent evaluation tools, both for individuals and organizations. He references a number of websites for additional clarity of some of his points. He has an excellent reference list at the end of the book. Anyone who is looking at leadership and organizational values/vision/mission will do well to read this timely book. Based on his experience working with over 1,000 organizations in 32 countries on cultural transformation for the values-driven organization. "When I reflect on what makes an outstanding organization, I keep coming back to the effectiveness of our people individually and collectively. Our responsibility as leaders therefore is to enhance, harness and direct the capacity and energy of our people towards virtuous and valuable ends. Long-term success has to have a solid foundation built on principles and values that act as a centre of gravity. In business you get what you target, design, measure, provide incentives for and are passionate about. This applies equally to principles and values, which need to be nurtured and directed through an effective whole systems approach and values-management framework. This is exactly what Richard Barrett provides in *Building a Values-Driven Organization*. As an active and experienced user of Richard Barrett's Cultural Transformation Tools, I commend his ideas and frameworks to anyone who is committed to a values-based approach and to long-term sustainable success." -- John McFarlane, Chief Executive Officer, ANZ Bank, Melbourne, Australia
"We began working with McKinsey's to research bank turnarounds out of which was the great story of the turnaround of ANZ bank in Australia under the leadership of John Macfarlane. This in turn led us to Richard Barrett's book *Liberating the Corporate Soul*. The book gave me not only a much clearer insight into culture and values but for the first time provided a way of mapping values and measuring alignment. These concepts and methodologies have been taken to new levels in *Building a Values Driven Organisation - a Whole System Approach to Cultural Transformation*. The whole system approach has provided our organization with an extraordinarily powerful practical framework for guiding and driving transformation in every aspect of our organization." -- Tom Boardman, Chief Executive Nedbank Group, South Africa

of the yearning to create organizations that are more productive and more profitable and also more satisfying places in which to work. This is a first-class, practical, book that any business, government or non-profit agency can use to good advantage. It should be read by anyone who believes values shape behavior. And it should certainly be read by anyone who does not. Barrett is smart. More importantly, he is wise."-- Susan A. Lieberman Ph.D., Director, Leadership Rice, Rice University, Houston, Texas"Richard Barrett's latest book is the definitive change agent's bible and a practical leader's guide and roadmap to cultural transformation. At CIBC, Richard has shared both his vision and enthusiasm in leading us on our journey of being a leader in client relationships."-- Philip Wilson, Senior Vice President Shared Services, Human Resources, CIBC, Canada"At last! A book that focuses on the "How" rather than the "What." The insights in this book represent leading-edge of thinking in whole system change. Richard's passion for making the world a better place through business will move several steps closer as people employ the tools and techniques detailed in this book. Well done Richard!"-- David Carter, Chairman Founder, Merryck Co., London, UK"Richard's new book makes me think of a quote Gandi made: "Be the Change and you'll Be the world". Indeed, organizational transformation always starts with the personal transformation of the executive team. The deepest connection that bonds people together is shared values. In a very clear and comprehensive way this book explains how one can enhance this bonding, create an atmosphere of wellbeing at work, and improve performance. A must read for every leader."-- Adelheid Maekelberg , Head of Service Training, Coaching Development, Banksys, Belgium "Richard Barrett at his mind-expanding best. The reptilian part of me frets that our competitors might get this book before it has become part of our DNA."-- John Elkington, Chair, Sustainability, London, UK"As a former leader of an organization that was listed as one of the most values aligned companies, this book truly represents my experience. Barrett's brilliance is in taking a highly complex models and making them understandable for practitioners to follow. Building a Values-Driven Organization goes to the core of what drives change and sustains systems: what motivates and influences us as individuals. This link between strategic goals on the macro level and individual behavior is invaluable for anyone involved in effecting a cultural change. For practitioners in the area of business ethics and compliance, Barrett's analysis is the most innovative to date in helping build a true integrity-based culture by looking at the values and motivations of individual employees and managers that drive ethical behavior."-- David Gebler, President, Working Values, Ltd., Sharon, Massachusetts"Now business managers have a way forward. A brilliant, clear-minded exposition to enable the urgent creation of the better world we all want to see."-- Goderic Bader, Life President, Scott Bader, Wollaston, UK"If you want your organization to consistently perform at peak levels you need to become values-driven - a company that is characterized by strongalignment between individual values and corporate values; a company characterized by strong alignment between individual and group sense ofmission; a place where the 'walk' matches the 'talk'.
