Lean Thinking Makes This Book a Winner!By IslanderMr. Herbert is the only author of books about selling your business that is also well versed in Lean Thinking (Toyota Production System). This fact alone makes his book invaluable because becoming Lean is the most powerful way to increase the value of most businesses before selling them. The work "blueprint" is fitting because Herbert's book offers a simply written and easy to follow sequence of steps for preparing a business for sale. I've looked at many checklists for selling a business and, in my opinion, this book offers the most comprehensive and straightforward approach. If you only buy one book on the subject, this is definitely the one you want.0 of 0 people found the following review helpful.
