**Sanjay Mohapatra : Business Process Reengineering: Automation Decision Points in Process Reengineering (Management for Professionals)** before purchasing it in order to gage whether or not it would be worth my time, and all praised Business Process Reengineering: Automation Decision Points in Process Reengineering (Management for Professionals):

0 of 0 people found the following review helpful. Good readBy maedseVery good read with detailed information for

those just starting out in the BPR and BPA environment. I would recommend to others.

Business process reengineering (BPR) focuses on redesigning the strategic and value-added processes which transcend the organizational boundaries. It is a cross-functional approach that requires support from almost all the departments of the organization. Business Process Reengineering: Automation Decision Points in Process Reengineering offers a new framework based process reengineering and links it to organization life cycle, process life cycle, and process management. This volume describes the fundamental concepts behind business process reengineering and examines them through case studies, and should appeal to researchers and academics interested in business process reengineering, operations strategy, and organizational restructuring and design.

This book takes the reader on a journey to show in a clearly readable form how automation of re-engineered processes can increase your business's competitive advantage. The book uses engaging case studies which brought the subject matter alive. I would thoroughly recommend this book to my readers. (M. Kaan, Inside Business, August, 2015) The goal of the book is to define automation decision points as supported through BPR. A book that provides guidance in this area would be of value to industry and government organizations. (Nancy Eickelmann, Computing s, August, 2013) From the Back Cover This book deals with different concepts, approaches and applications for business process re-engineering. It illustrates how to take giant strides to attain market dominance in a dynamic business world. The book shows how automation of re-engineered processes can increase competitive advantage for a firm. Based on author's experience in handling several re-engineering projects at international levels, it depicts a practical guide for step by step approach for redesigning processes and automating them to increase sustainability, predictability and transparency in process management. Using several case studies, the book also shows how different companies have streamlined their processes, reduced their cost of operations, have created cross functional process excellence to increase value proposition to all stakeholders. About the author Dr. Sanjay Mohapatra received his B.E. from NIT Rourkela, MBA from XIMB, M.Tech from IIT Madras, India and PhD from Utkal University.
