**Michael I. Harrison : Diagnosing Organizations: Methods, Models, and Processes (Applied Social Research Methods)** before purchasing it in order to gage whether or not it would be worth my time, and all praised Diagnosing Organizations: Methods, Models, and Processes (Applied Social Research Methods):

0 of 0 people found the following review helpful. Five StarsBy Randell Trammellgreat experience. great product.0 of 0 people found the following review helpful. Five StarsBy Carlos MachucaA must have book for consultants!0 of 0

people found the following review helpful. Good priceBy DebosayoGreat pricing and the product arrive in time before the time it was needed. But the only issue was that because it was an international product, the table of content was arranged differently from the US version. Although the contents were the same.

The Third Edition of the bestsellingnbsp;Diagnosing Organizationsnbsp;shows how consultants and applied researchers can help decision makers quickly and flexibly diagnose problems and challenges and decide how to deal with them. This thoroughly revised edition can help practitioners of diagnosis directly address concerns that are critical to clients, rather than just provide feedback on current conditions and operations. In an authoritative yet readable fashion, author Michael I. Harrison presents updated treatments of the uses of diagnosis, evaluating organizational effectiveness, improving team performance, planning organization redesign projects, and assessing organization-environment relations and competitive strategy. Also treated are the politics of change management, professional dilemmas, and ethical issues confronting practitioners.

About the AuthorMichael I. Harrison, Ph.D, is a Senior Social Scientist in the Center for Delivery, Organization, and Markets at the Agency for Healthcare Research and Quality (AHRQ). He leads Agency activities in Health System Design, manages and contributes to research in delivery systems across the United States, and conducts research on organizational improvement and implementation of system change. His publications include papers in leading health services research journals, *Diagnosing Organizations: Methods, Models, and Processes* (Sage, 2005), and *Implementing Change in Health Systems: Market Reforms in the United Kingdom, Sweden, and the Netherlands* (SAGE, 2004). He has given presentations and led workshops at scientific and professional conferences throughout the United States and Europe. Dr. Harrison holds a Ph.D. in Sociology from the University of Michigan. He was previously a faculty member at the State University of New York (SUNY), Stony Brook, and at Bar Ilan University in Israel; a visiting professor at Boston College and Haifa University; and a visiting scholar at Brandeis University, Georgetown University, Harvard Business School, and the Nordic School of Public Health.
