Comprehensive discussion of Web marketingBy Rolf DobelliLeland Harden and Bob Heyman's authoritative guide is

exciting some of the time, rather boring other times, and absolutely essential for anyone working in online marketing, branding, public relations (PR) or community building. getAbstract recommends it to all contemporary marketing professionals and anyone else who is trying to shape a coherent policy for engaging consumers online. When the book is dull, it is dull for the same reasons it is so essential: In places, it is a reference work, which you might consult regularly in short bursts, rather than read through in its entirety. Given that, the index should include each person and Web site the authors mention but, alas, it does not. The book is exciting because it provides two related, necessary pieces of information: specific guidelines for developing online campaigns and tools for measuring their success. If you read it, you'll be able to plan consistently, maximize your online PR investment and track how you've done.<sup>3</sup> of 4 people found the following review helpful. Digital Engagement: Internet Marketing That Captures Customers and Builds Intense Brand Loyalty  
While I am an accomplished entrepreneur having owned three successful businesses I admit I was intimidated by trying to wade through the new and expanding world of internet marketing. There isn't a day in my life that I don't access the internet for one reason or another but I had not even scratched the surface when it came to utilizing the power of this beast to build my business. That is until I ran across Leland Harden's "Digital Engagement". This book not only laid out a path for me to navigate towards success with internet marketing it gave me tools that I implemented that very day that changed the course of my business, literally. I went from no presence (not even a website) to getting in front of 80,000 qualified customers and actually interacting with 33 of them that showed an interest in my store within 3 days and for only \$20. Amazing. Needless to say the door has been opened and it is because of "Digital Engagement". I am personally purchasing a copy of it for my close friends that have a need for business expansion. When I purchased the book for myself I had an event planned in my store and was concerned because I had very little interest. I ended up with over 50 customers in the store and sales were through the roof. Thanks guys, thanks for brining the "world wide web" to my backyard and showing me how to work it!![...]
