information is condensed and just gives you the exact information you need to get started. It starts you off easy with learning how to create a blog, then moves on to freelance article writing and e-books. She gives you the exact way to write an article, step-by-step, which I appreciate since it's been years since I've written an article (I was on the high school newspaper). Leslie also gives encouragement, making you feel like if you persevere, you WILL succeed in having a writing career. She also mentions that her teachers would probably laugh if they knew she made a living off of writing. That just gave me more hope that "Hey, I can do this too!". It has my highest recommendation!

I am a fan of Leslie and it's the first book I got of hers. I like the fact that she was well organized in each section while talking about some sites that hires freelance writers, bloggers and reviewers. You also get to learn how to earn some passive income which is what every writers want.

Thought this was a good reference of where digital opportunities are. Some info on formatting can be found elsewhere but some readers may like finding it here. Especially liked the marketing tips on street teams and cover design. Would be helpful to know where to buy templates in the text where that was mentioned. Overall, happy to have read this.
