From Palgrave Macmillan : Forecasting, Warning and Responding to Transnational Risks before purchasing it in order to gauge whether or not it would be worth my time, and all praised Forecasting, Warning and Responding to Transnational Risks:

Assembling a high profile group of scholars and practitioners, this book investigates the interplay of forecasting; warnings about, and responses to, known and unknown transnational risks. It challenges conventional accounts of

'failures' of warning and preventive policy in both the academic literature and public debate.
