By Kent CAs a corporate attorney and Christian, I have witnessed close up the harsh moves and ethically questionable ploys of so many business executives who are committed to the concept that business is a game which requires that ruthless gamesmanship be employed in order to succeed. Tom boldly bucks that pervasive notion in a compelling way with God Goes to Work. His book reveals the secrets of a successful CEO who has experienced how letting God and goodness direct your

decisions can lead to just as good or better results than being a raging bull-CEO always out for the blood of his rivals and corporate competitors. A must read for every executive with a conscience. 0 of 1 people found the following review helpful. Must Read For Business Leaders By Paul Walker Tom Zender's book is excellent. There is no separation between the spiritual world and the world of business, yet we fight this reality and often turn away from deeper insights that can drive business. Tom's book adds to the wisdom of business leadership in a big way. It is a must read for those who seek to be great leaders in business. A champion of meaningful work By Petti Van Rekom I've spent my professional life encouraging employers to improve their work environment. I've dealt daily with employees who are not motivated to perform at their best. Now I help people evaluate a potential new workplace. I met Tom and his wife Wendy many years ago. We share a common passion in helping people find more meaning in their life through their work. Tom Zender is a "new thought" leader who urges us to change our thinking about how business is conducted. He points out that in order to compete in the globalized economy, all people must function at their full potential He makes a strong case for improving the work environment by providing more opportunity to express our spiritual selves. He gives plenty of history and examples to convince the reader (and business leaders) that it makes economic sense to enable employees to find meaning through their work. Tom lays out for us the concept of a "spiritual transaction" which is an interaction that maximizes the potential of all involved. As Deepak Chopra points out in his introduction, many of us are seeking a new way of ending the "tyranny of stress" in the workplace and wanting meaningful work that gives us deep satisfaction. Hopefully Zender's words, along with the many who came before him, will create a groundswell of change in the workplace. Petti Van Rekom, Ed. D The Workplace Review
