Organizations: Team Performances and Financial Consequences:

Frank Jozsa provides an interesting format in his description of each of the current major league baseball franchises. Baseball fans will enjoy his analysis of each team as he gives information and data regarding the team's history, performance, owner, ballpark, fan cost, financial status, and business relations. (Gary Stone, Winthrop University) League comparisons and team histories are merged with factors that influence franchise financial success resulting in a must-read for business experts and fans who want a broader understanding of the current status of our American pastime. Highly recommended. (Laddie Sula, Loras College) About the Author Frank P. Jozsa Jr. is a retired professor of economics and business administration from Pfeiffer University.
