**Daniel, Dr Leon Hempel : Managing Privacy through Accountability** before purchasing it in order to gauge whether or not it would be worth my time, and all praised Managing Privacy through Accountability:

Draws together contributions from leading figures in the field of surveillance to engage in the discussion of the emergence of accountability as a means to manage threats to privacy. The first of its kind to enrich the debate about accountability and privacy by drawing together perspectives from experienced privacy researchers and policy makers.

'Can robust forms of accountability successfully temper the negative effects of contemporary surveillance? This book provides a much-needed, critical exploration of the potentials of accountability cultures to transform institutions so that privacy protections are taken seriously.' - Torin Monahan, author of *Surveillance in the Time of Insecurity*
