Great book for marketers (i.e.: all business owners!) who don't have time to properly study marketing or want a quick "refresher".As a web developer, I highly recommend reading this book before building your website!2 of 2 people found the following review helpful. Finally here us invaluable help for writersBy Werner StejskaI don't believe in repeating the whole book description

here. Can I just say that this book is not only for writers to improve themselves, but for everybody who will sooner or later have the need to write an important document where style and efficiency counts. I have read a lot of this kind of books, but still I could find many valuable tips there. This is definitely something you want to have on your shelf! 3 of 3 people found the following review helpful. persuasive writing By Lin Read This book is a must have for all those people involved in any kind of writing or speaking - whether formal or informal. I think it should be essential reading for students starting in the sixth form - personal statements, essays especially when there is a need to do timed essays so every word is precious and there is no time for 'space fillers'. Peter F combines a readable manual succinct and to the point (He'd disapprove of that space filler) I have to do presentations and this is a good ready reckoner. I can flick through to any section and do a quick check on my own writing. It is not a solid read but full of pithy statements and easy to remember 'rules'. The bonus? Its actually enjoyable with Peter's drole humour.
