**J. L. Birkler, G. Smith, F. Timson, J. Large : Reconstituting a Production Capability: Past Experience, Restart Criteria, and Suggested Policies** before purchasing it in order to gauge whether or not it would be worth my time, and all praised Reconstituting a Production Capability: Past Experience, Restart Criteria, and Suggested Policies:

Should weapons production slow to a stop? This book suggests steps that might be taken at production shutdown to

ease restart.

From the Inside FlapEvaluates the feasibility of restarting weapon system production lines in response to a resurgent major threat and suggests steps that might be taken at shutdown to ease restart.About the AuthorJohn L. Birkler (Executive Management Program, 1991-1992, UCLA) is a Research Leader, Acquisition, Defense Production and Technology Base Issues, Acquisition and Technology Policy Center, National Defense Research Institute, RAND, Santa Monica, California.
