From Routledge : Research Frontiers on the International Marketing Strategies of Chinese Brands (China Perspectives) before purchasing it in order to gage whether or not it would be worth my time, and all praised Research Frontiers on the International Marketing Strategies of Chinese Brands (China Perspectives):

This book proposes a theoretical framework identifying external and internal factors that influence internationalization strategy of Chinese brands and brand performance. It explores several key strategies e.g. standardization versus adaptation, price leadership versus branding, OBM export versus OEM export, and incremental versus leap-forward internationalization model. The relationships are examined between various international marketing mix e.g. distribution channel and pricing strategies, and brand performance. Through case studies the text also analyses the internationalization of contract-based firms.
