From Cambridge University Press : The Cambridge Handbook of Meeting Science (Cambridge Handbooks in Psychology) before purchasing it in order to gage whether or not it would be worth my time, and all praised The Cambridge Handbook of Meeting Science (Cambridge Handbooks in Psychology):

2 of 2 people found the following review helpful. ... relevant research in this important area gather in one great handbook.By CustomerFinally all the relevant research in this important area gather in one great handbook.

This first volume to analyze the science of meetings offers a unique perspective on an integral part of contemporary

work life. More than just a tool for improving individual and organizational effectiveness and well-being, meetings provide a window into the very essence of organizations and employees' experiences with the organization. The average employee attends at least three meetings per week and managers spend the majority of their time in meetings. Meetings can raise individuals, teams, and organizations to tremendous levels of achievement. However, they can also undermine effectiveness and well-being. The Cambridge Handbook of Meeting Science assembles leading authors in industrial and organizational psychology, management, marketing, organizational behavior, anthropology, sociology, and communication to explore the meeting itself, including pre-meeting activities and post-meeting activities. It provides a comprehensive overview of research in the field and will serve as an invaluable starting point for scholars who seek to understand and improve meetings.

"The Cambridge Handbook of Meeting Science is quite a breakthrough in this area because it harnesses various pieces of research and information on the subject in one text. It therefore provides a comprehensive examination of the information on meetings from numerous different perspectives and, as a result, will be an invaluable and unique addition to the library of universities and other educational establishments where management or business is studied. It will also be of use in large corporations." Mabel Blades, Business Management

About the Author Joseph A. Allen is an assistant professor of Industrial and Organizational Psychology at the University of Nebraska, Omaha. Nale Lehmann-Willenbrock is an assistant professor of Social and Organizational Psychology at VU University Amsterdam, the Netherlands. Steven G. Rogelberg is University Professor of Psychology and Management and the Director of the Organizational Science program at the University of North Carolina, Charlotte.
