In 1996 I was a victim of identity theft myself. At that time there were no laws even making it a crime against the individual victim. For years I have collaborated with wonderful, caring consumer advocates to pass laws in California and in Congress to help protect consumers from this insidious and pervasive crime. Although we have help and strategies to help you regain your good name, the crime has increased dramatically. Be prepared to fight back against the invisible thieves. As you read this book, I will take you by the hand and show you how to maneuver through the maze of the obstacles of identity theft to become victorious!.
