Start Here if You're Thinking About Selling Your HomeBy Dana StoneThe Complete Idiot's Guide to Selling Your Home is written by two experienced and savvy individuals. You'll learn practical tips about how to choose the best realtor, how to market your home, and what to avoid (like trying to sell the house yourself). I found Chapter 3 especially helpful. It presents helpful questions to ask the realtors you are going to interview. The suggestion to find how how the realtor will market your home is especially helpful because the seller will want to have the home marketed globally. Another chapter focuses exclusively on pricing the property and when to reduce the listing price. Obviously, if no one is making an offer, you're asking too much and the authors suggest going down on the listing price. I highly recommend this book, whether you're planning to sell now or not.0 of 2 people found the following review helpful.
