Owen Valuable education material: academic at my age, but important in my role on the Executive of "The Electronic Technology Club" based at the Colborne Seniors Centre, Oakville where we seek to enhance the knowledge of our membership. Sequence - read the original chapters first, selectively to your interest! I also purchased for Granddaughter (Engineer) Grandson (Sports Marketing) as Ch 10 Leadership for the Interneted Business has useful reference value. 0 of 0 people found the following review helpful. Good read, to see into the future of technological improvement(s). By Omotola O. Don Tapscott, seem to have a crystal ball, when he wrote about future event/happenings in technology in 1995 and real enough in 2014 it happened, some are yet to happen though, but if you are observant and have read this book I am reviewing "The digital economy", you will see it too that it is also going to happen, Kudo to Don. Well done/said Don, well said Don. 0 of 0 people found the following review helpful. Still Crazy After All These Years in a good way By Stephen A. Caswell The Digital Economy was a seminal work in its day and Tapscott's rewrite updates the book to today's world. His insights are still highly perceptive and worth considering by anyone involved in planning to compete in today's business environment or anyone who wants to understand today's business world.

Twenty years of hindsight prove how deeply Tapscott understood the impact the Internet would have on the way we live, work, play and learn. This important book, now updated, is just as relevant today as it was then. John Chambers, Chairman and CEO, Cisco With a new foreword by Eric Schmidt, Chief Executive of Google Two decades ago, The Digital Economy changed the way the world thought about the Web and Internet. While everyone else was in awe of "websites" and "dot coms," Don Tapscott was among the first people to argue that the Internet would fully transform the nature of business and government. It goes without saying that his predictions were spot on. Now, in this new edition of his classic work, the New York Times bestselling author provides topical updates with a sweeping new analysis of how the Internet has changed business and society in the last 20 years, covering: Natural frictions between present-day Industrial Capitalism and the Digital Economy The radical effects of the Internet on traditional corporate structures and systems Dramatic changes in business collaboration and culture thanks to social media The rise of web-based analytics and how they have transformed business functions Government transparency, citizen empowerment, and the creation of public value Teaching and learning—revolutionary developments driven by digital content When Tapscott was writing the original edition in 1994, he was living in a world where Netscape had been just introduced as go-to browser, websites didn't do transactions, dial-up was the only way to get online, and mobile phones sightings were rare. Google, YouTube, eBay, Facebook, Twitter? They didn't exist. Preserving all the original text as it appeared 20 years ago, this new edition includes detailed essays ending each chapter—Tapscott's highly informed reflections on his predictions, along with new forecasts of where the digital world is headed. Praise for the new edition of The Digital Economy "1994 was a good year. Netscape Navigator and The Digital Economy. With this anniversary edition, Tapscott provides lucid insights for the next stage of these amazing times." Marc Andreessen, Co-founder and General Partner, Andreessen Horowitz "Brilliant. Governments can learn from The Digital Economy how to democratize access to prosperity, minimize social and economic divides and transform government and democracy for the 21st Century." Enrique Pentilde;a Nieto, President of Mexico "We're now into three decades of terrific insights and analysis from Don Tapscott about the digital revolution! Read this book!" Ajay Banga, President and CEO, Mastercard

About the Author Don Tapscott is one of the world's leading authorities on innovation, media, and the economic and social impact of technology. Named one of the world's most important living management thinkers by Thinkers50, he advises business and government leaders around the globe.
