J. C. Hull : The Evaluation of Risk in Business Investment (Pergamon international library of science, technology, engineering, and social studies) before purchasing it in order to gage whether or not it would be worth my time, and all praised The Evaluation of Risk in Business Investment (Pergamon international library of science, technology, engineering, and social studies):

Provides finance specialists in industry and students of management with a comprehensive set of practical procedures for evaluating the total risk in the major capital investment decisions facing a business. It discusses in detail how companies can make effective use of sensitivity analyses, risk simulations and other techniques, and deals in depth with important issues, such as: How should the results of a sensitivity analysis be interpreted?; How can adequate subjective probability distributions be obtained? How can dependencies between variables be dealt with in a practical way?; The emphasis throughout is on 'how to do it' and the reader needs only a slight knowledge of statistics. A particularly important feature of the book is the FORTRAN subroutines in Appendices A and B which the author prepared for calculating risk evaluations
